Expand your revenue stream

Diversify your offers

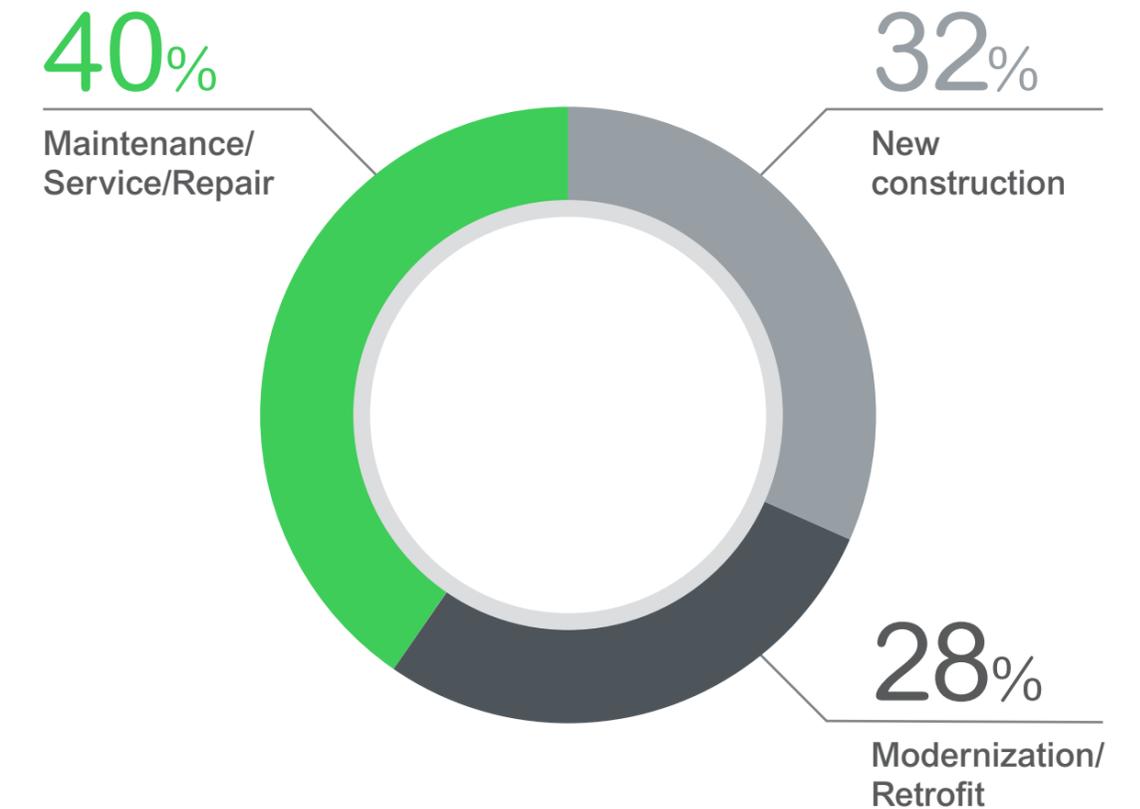

As a contractor, factors such as economic highs and lows, weather, and even politics can impact your business. An effective way to stabilize your revenue stream is to expand your business offerings to include operational solutions.

According to the [IBIS World 2018 report](#), operational solutions, such as maintenance, service, and repair activity, along with modernization and retrofitting work, represent 68 percent of the U.S. construction industry's revenue.

These solutions — [often referred to collectively as maintenance, repair, and operational supply \(MRO\)](#), make up the majority of work for all contractors and account for a proportionally larger share of revenue for smaller companies.

This guide details the products and solutions available to help you build out your MRO offerings, whether you are small, medium, and large company.

Understanding MRO

What is MRO?

MRO is short for maintenance, repair, and operational supply. MRO includes the products and services necessary for the ongoing operation of electrical equipment.

MRO offers across the asset lifecycle

Contractors can offer MRO solutions throughout the entire equipment lifecycle.

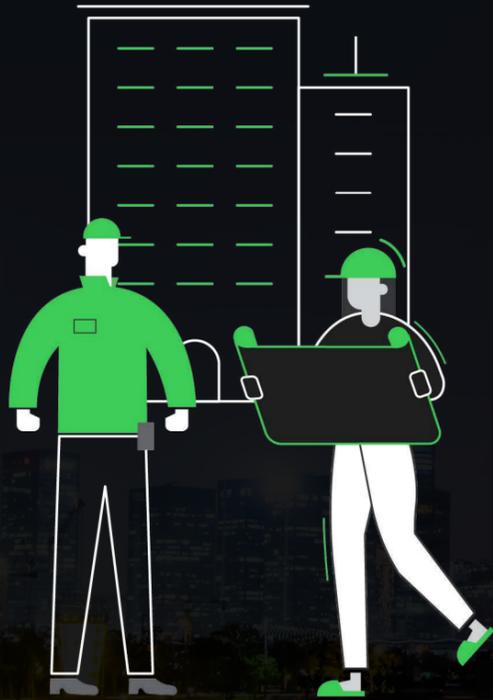

MRO products and services include:

Planning

What are the equipment options?

- Design and feasibility studies

Installation

How to install and commission

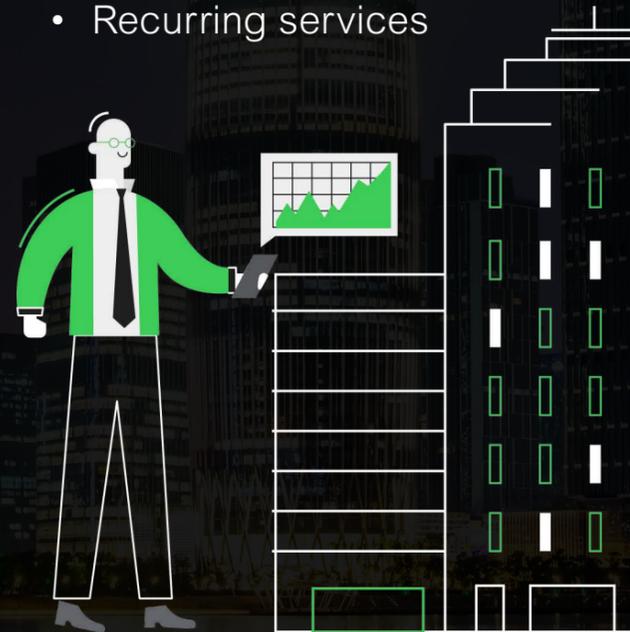

- Start up
- Commissioning
- Extended warranty

Operations

How to operate and maintain equipment

- Preventive, corrective, and predictive maintenance
- Remote monitoring
- Spare parts
- Customer training
- Recurring services

Optimization

How to optimize performance

- Consulting services
- Arc-flash studies
- Remote monitoring

Renewal

How to renew the solution

- Modernization (replacement and upgrades)
- End-of-life services

Who benefits from MRO?

Both customers and contractors benefit from MRO offerings.

By investing in MRO solutions, customers can:

- Improve operational efficiency
- Increase the lifecycle and value of electrical equipment
- Minimize business interruptions
- Minimize safety risks
- Save money associated with reactive maintenance

At the same time, contractors can:

- Stay connected to the customer by providing maintenance throughout the product lifecycle
- Build strong relationships with customers
- Ensure consistent revenue

About us

Today's connected and digital world demands a level of expertise that understands how complex electrical systems integrate. At Schneider Electric,™ the goal for supporting the customers who install and deploy Square D™ products is straightforward: Innovate and simplify the connectivity of electrical distribution equipment for greater business efficiency.

For over 115 years, consulting engineers, contractors, homebuilders, and distributors have recognized Square D as the gold standard of efficiency, safety, and reliability. Recent advances in technology have opened the door to new Square D products and smart solutions, many of which are included in this guide.

Residential MRO drives energy efficiency and enhanced safety.

Surge protection

Surge protection

Whole-home surge protection

Surge protection devices (SPDs) are required for services supplying all dwellings. SPDs block the shock caused by a surge at the load center, preventing damage.

There are two types of SPDs:

- Type 1 SPDs are installed before or after the main disconnect
- Type 2 SPDs connect to the load side of the service disconnect

Customer benefits

- Prevents damage to residential appliances and electronics
- Easy installation saves money

Real-time energy monitor

Real-time energy monitor

Wiser Energy™ home energy

Installs in a home's electrical panel and provides real-time data on energy use and savings through the Square D edition of the Sense app. This system can also be used to manage residential solar generation.

Customer benefits

- Gain 24 / 7 access to real-time energy use
- Receive instant alerts when appliances and devices switch on or off
- Calculate energy savings and better estimate monthly bills
- Install easily into a residential electrical panel by a licensed electrician
- Integrate with smart home devices
- Optimize solar generation

Circuit breakers

Circuit breakers

Molded case circuit breakers

PowerPact circuit breakers lead the industry in reliability and protection. New, replacement, and retrofit molded case circuit breakers are available from 15 – 3,000 amps.

Product range

- B-frame for 15 – 125 amps
- H-frame for 15 – 150 amps
- J-frame for 70 – 250 amps
- Q-frame for 75 – 250 amps
- L-frame for 70 – 600 amps
- M-frame for 300 – 800 amps
- R-frame for 240 – 3000 amps

Customer benefits

- Standardized ratings
- A wide range of field-installable accessories and operating mechanisms
- Available in most sizes in unit and I-Line models and 1 – 4 pole designs
- UL 489 listed, CSA, NMX, IEC certified for international applications

All-in-one energy management solution to measure energy use and improve energy efficiency and cost savings. Ideal for:

- Energy code compliance
- Green certifications
- Cost allocation
- Tenant sub-metering
- Energy management
- Performance contracting
- Load shed and demand response

Customer benefits

- One part number for the kit, including meter LVCTs, and enclosure
- Compact

ecoFit™ 50/51

Self-powered, digital single-phase retrofit relay serves as a direct plug and play replacement for many GE IAC relays.

Customer benefits

- Plug and play reduces install time and reuses existing wiring
- Multi-vendor curves to retrofit legacy equipment without coordination studies
- Self-powered
- Post-fault analysis includes disturbance recording, fault records, and event logs

Modernization solutions

Modernization renews your existing equipment.

Upgrade existing aging electrical equipment and infrastructure with new technologies that enhance safety and improve your equipment reliability, performance, and connectivity.

Solutions available

- 300+ direct replacements solutions for LV and MV breakers
- Retrofill solutions for legacy Square D breakers, P-frame breakers, and bolted pressure switches
- Motor control center bucket direct replacement solutions for Square D Model 4, GE 7000 / 8000 series, and Telemecanique™ 5600
- Retrofill solutions for motor control center buckets

Customer benefits

- Reduce initial investment by reusing existing electrical infrastructure
- Decrease planned downtime
- Plan phased upgrade over time
- Designed and tested per ANSI requirements
- Backed by a one-year warranty
- Address environmental concerns
- Monitor performance of existing equipment
- Add or enhance digital connectivity
